

Roberto Vargas:

Roberto Vargas is a Costa Rican architect, currently finishing a second year master's in Robotics and Advanced Construction, in collaboration with Zaha Hadid Architects and Scaled Robotics at IaaC, Barcelona. He specializes in computational design and architectural visualization. His research focuses on the digitalization of the construction industry, where as a technology enthusiast he innovates by combining exciting features of different disciplines for circular solutions.

Matthew Gordon:

Matthew Gordon is a designer and digital artist, currently pursuing a Masters in Robotics and Advanced Construction at IaaC, Barcelona. He works to apply digital design approaches for direct and real world effects, particularly their possibilities for health and the environment. He has previously collaborated with Playground of Empathy and the University of Virginia's Architectural Robotics Research Group.
